Unreduced Retirement Example

$$\begin{aligned} &30 \text{ years of service} \\ &\quad \times 2.2\% \\ &= 66.0\% \\ &\quad \times \$85,000 \end{aligned}$$

= \$56,100 Annual Pension Benefit
= \$4,675 Monthly Pension Benefit

Example

Member:

- Age 67 (Tier 2)
- Years of Service: 30
- Average Salary: \$85,000

Reduced Retirement Example

30 years of service

x 2.2%

= 66.0%

x \$85,000

= \$56,100 Annual Pension Benefit

-30% Age Reduction

= \$39,270 Annual Pension Benefit

- A reduced pension is permanently reduced.
- If you stop working at any age and defer retirement until age 67 for Tier 2, your pension will be unreduced.

Example

Member:

- Age 62 (Tier 2)
- Years of Service: 30
- Average Salary: \$85,000

Maximize Your Pension

Service Credit x Formula Factor x FAS = Pension

There is no guarantee that any investment option will achieve its stated objective. Principal value fluctuates and there is no guarantee of value at any time, including the target date. Investments in Target Retirement Funds are subject to the risks of their underlying funds. The year in the Fund name refers to the approximate year (the target date) when an investor in the Fund would retire and leave the work force. The Fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. An investment in the Target Retirement Fund is not guaranteed at any time, including on or after the target date.
